

Job Classification / Title: Aircraft Painter
Full or Part-Time: Full Time
Job Location: Nellis AFB

Job Description (requirements, required certifications, education, experience, and required clearances):

GENERAL REQUIREMENTS: Conducts daily back shop Aircraft Painter operations.

Repairs, modifies, fabricates and applies corrosion protective coatings and markings to aircraft structures, equipment, advanced composites and bonded structural parts. Assesses damage to aircraft coatings.

Checks repairs for serviceability according to specifications and technical publications.

Identifies, removes, and treats corrosion using mechanical and chemical procedures.

Reads and interprets manufacturers' and aircraft's maintenance manuals, service bulletins, technical data, engineering data, and other specifications to determine feasibility and method of repairing or replacing of damaged components.

Receives technical guidance from Managers, Leads or higher level technicians as required.

May be required to obtain and maintain special certifications as directed by management.

Reviews and completes forms documentation pertinent to aircraft or equipment maintenance, enters maintenance actions into applicable MIS system and will make entries in forms, logs, records or electronic equivalent as required.

May be required to monitor and lead teams to perform more complex aircraft inspections and repairs.

May be required to write/initiate engineering technical assistance requests.

SPECIFIC REQUIREMENTS: Minimum of 3 years performing functions listed above.

General working knowledge of USAF or sister service Corrosion requirements.

Additionally, A-10, F-15C/D/E or F-16 Corrosion or Sheet Metal experience and F-16 RAM background is highly desired.

General working knowledge of USAF MIS systems, forms documentation and strict adherence to aircraft technical data is required.

Complete all assignments and tasks as directed by managers, leads, and more senior technicians.

Will be required to obtain and maintain respirator qualification.

High school diploma or GED is required. Mathematics skills are desirable.

Must speak, read, write, and understand English with the ability to interpret technical data and special operating instructions in the same language.

Knowledge of principles, concepts and applications of maintenance directives, data reporting, and using technical data is mandatory.

Must be willing to deploy to support off-station requirements.

Performs housekeeping duties within 100 feet of assigned work areas (excluding bathrooms).

Performs vehicle use inspections, cleaning and wash.

Performs any other supportive duties as assigned.

Must be physically capable of performing all assigned duties.

Must be able to obtain and maintain a Secret security clearance (or higher, if required).

Must be able to, if required, obtain and maintain a government driver's license. If controlled movement area (CMA) access is required must be able to pass color vision test.

Environment ranges from office, hangar and flight line and requires extensive climbing, standing, stooping, bending, pushing, kneeling, stretching, and walking demands.

May be required to work in other work sections throughout the contract where individual possesses required experience, training, and/or certifications.
